Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 25 August 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

Entry of Amendment

Applicant's amendment filed on Aug. 25, 2003, as Paper No. 8, is acknowledged. Claims 1-25 are currently pending.

Prior Rejections or Objections

The following comments pertain to the rejections or objections in the most recent Office action, Paper No. 7, mailed on May 23, 2003. All rejections are maintained and the reasons explained in "Response to Arguments" below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless—

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Abels et al. (6,491,715). Abels et al. disclose a system comprising:

an energy emitting device in the form of a laser diode (40) emitting at a wavelength of 805 nm, adapted to heat cells to a desired temperature; and

a material delivery device (syringe and needle) that delivers intravenously a fluid including 1-10 mg/kg (overlapping the range of 0.4-1.4 mg/kg) of ICG to the cells to be

heated which inherently alters a physical characteristic of the cells (the peak activation absorption of ICG is 795-810 nm and col. 5, line 64-col. 6, line 48). Note the control features in col. 6, lines 34-36).

Allowable Subject Matter

Claims 20-25 are allowed.

Claims 6-12 and 14-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments filed Aug. 28, 2003 have been fully considered but they are not persuasive. Functional language in a system claim is generally viewed as "intended use" when the language does not affect the structure of the system. A recitation of intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use (in this case reducing the power of the applied energy via the computer control), then it meets the claim. See *In re Casey*, 152, USPQ 235 (CCPA 1967).

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
